Intro – Customized flows

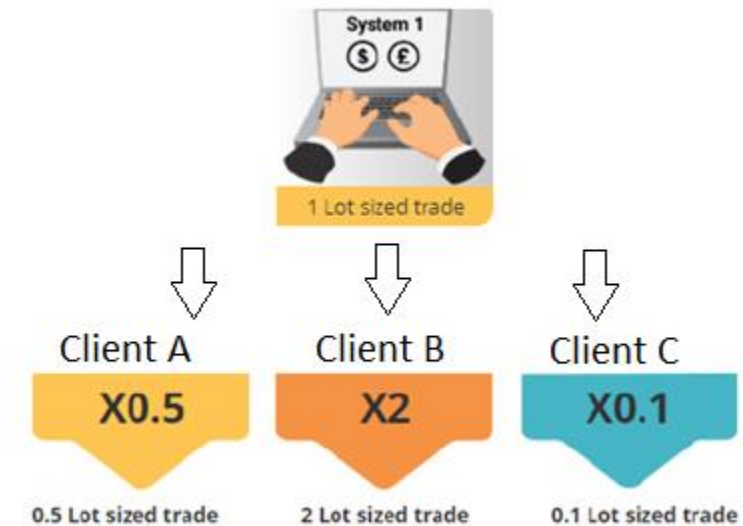

- ✓ External offices and local partners may have **specific business needs** for various ventures.
- ✓ For this reason, we at DupliTrade enable **customized setup of the platform** which allow local partners and external offices to tailor the presented view of the DupliTrade platform to their own needs.
- ✓ All customizations are **based on the Avatrade integration** and can be configured per AvaPartner Tag (each tag can have a unique setup)
- ✓ In the next slides you will be able to see the current available setups.

Single System setup (caged MM)

The single system setup was created to allow money managers to utilize DT technology as an alternative to Mam Technology

- ✓ By using the DupliTrade technology the partner allows each client to copy on his own standard MT4/5 account
- ✓ This is an advantage for large capital clients who usually prefer to be on a standalone account and not part of a “Pool/Mam” account that distributes trades by equity/balance.
- ✓ Far less operational load for the partner as the DupliTrade team supports the efforts and allows the partner to focus on sales and trading while we handle bureaucracy.
- ✓ Electronic POA , allows a smooth client flow with no need for hard copy documents.
- ✓ POA commercials can be configured as needed (Profit%)
- ✓ All setups will benefit from our EU regulatory umbrella

Managed account marketplace

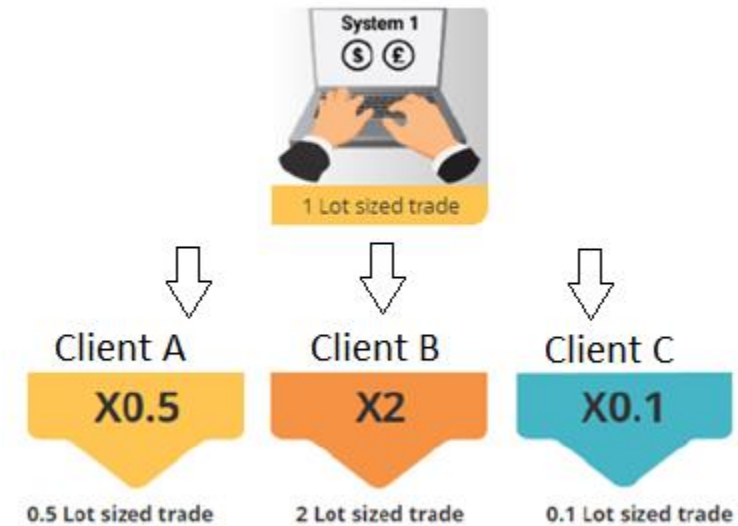

Single System Select

- ✓ This configuration presents several standalone “caged” strategies. (see last slide)
- ✓ Allows displaying a few MM’s trading strategies in one place
- ✓ The partner can create a managed account marketplace
- ✓ A money manager who trades on a few accounts can present them all in one place
- ✓ Before upgrading to real the client needs to select which of the system’s they wants to follow. This allows different commercial structure (POA terms) for each of the MM’s
- ✓ POA is still digital and hosted on the DT platform

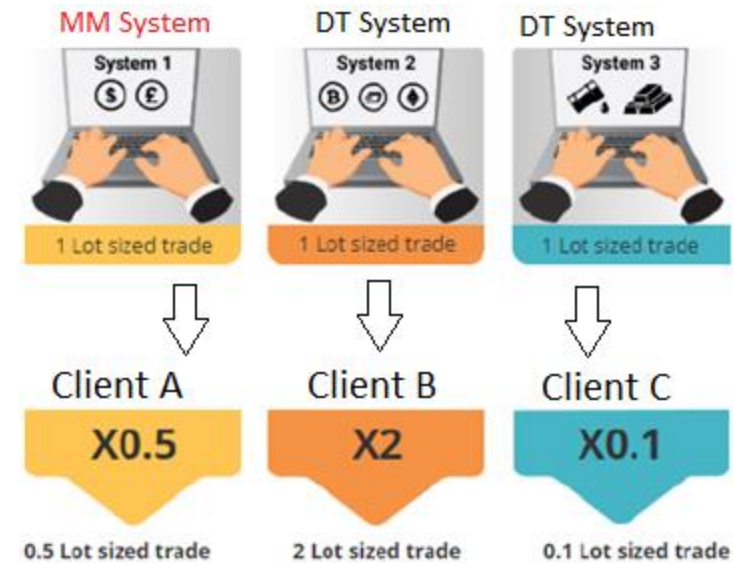

Strategy Selection

Please select which strategy you would like to copy

- ☒ MM system A
- ☐ MM system B
- ☐ MM system C

Tailored System Selection

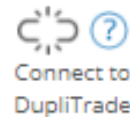

- ✓ This setup allows partners to customized the offering they present to clients
- ✓ The selection from our systems can be done in addition to the MM's own trading system.
- ✓ This presents an additional depth to the MM's offering and reduces churn rate while allowing clients to create self managed portfolios
- ✓ Prolongs the LTV by presenting clients various options
- ✓ MM's business is not dependent only on his own trading ,which can harm months of work with one bad trade round
- ✓ The variety of systems leads to additional deposits, Volume and overall higher client LTV

Strategy	Net P/L %	Net Profit	Trades	Win %	Profit Factor	Weeks	Followers	Chart
MM system	120.71 %	\$24,141.56	18136	66.92%	1.31	86	692	
Legacy	581.52 %	\$59,408.68	21480	47.47%	1.19	502	1408	
Titanium	331.16 %	\$16,557.91	7456	63.63%	1.15	226	975	
Spark	170.10 %	\$5GD 85,048.63	1133	69.29%	1.38	82	795	
Boulder	98.45 %	\$919.18	193	81.87%	2.03	48	468	

Client connection steps to the MM

- ✓ Regular Avatrade signup under partner AvaTag
- ✓ Click on the DupliTrade Button at the MyAva client area
- ✓ DupliTrade will then open on another tab (will display the only the MM master account)
- ✓ At DupliTrade click on “Upgrade to real” and complete the online steps (KYC+POA)
- ✓ Each connected client then selects the copy ratio for the MM
- ✓ Copy starts , all is automated for all future MM trades 😊
